

AL425 Axis II

Premium Inside Lift

PREMIUM 2-AXIS INSIDE LIFT

From a pleasing aesthetic to a highly adaptable design, the AL425 sets the standard for inside lifts. Fully powered lifting and rotation, coupled with an optional wireless remote, the AL425 is one of the easiest to use and install inside lift in the industry. It is the ideal solution to stow a power chair or scooter inside a van, truck or SUV.

Smaller vehicle space? The EZ-Detach Seatback accessory converts power chairs to a lower profile to fit more easily into small cargo areas. Includes easy-turn handles and a weight-distributing handlebar for easy removal and replacement.

- Only 30" of headroom required
- Its adjustability allows for faster installations in more applications
- Offset post allows the mobility device to be safely unloaded on the side of the vehicle
- Passenger or driver-site install
- Weather-resistant hand control (wireless option available AL413)
- Docking device and universal base adapter included

THE NEW STANDARD FOR INSIDE LIFTS

AL425 Axis II

Easy-to-use hand control Soft-Touch buttons.

I have used my Harmar Axis II lift for several years with virtually no problems. It's so easy to use. I can't remember all the folks who've seen the lift and wanted to know more about it. My Harmar Axis II gives me the mobility I want.
